

Systems Integrator Since 1983

# Computer System Profile

Innovation and dedication have led Computer Research Center to the forefront in delivering a comprehensive package called "**Computer System Profile.**" This package is like a blue print of your entire computer network system.

## Package includes:

- Hardware and software information of all servers.
- Hardware and software information of all workstations.
- Graphical presentation of physical location of all hardware components .
- Network topology and wiring schematics.
- Network connectivity of servers, workstations, hubs, switches, routers, and printers.
- Internet schematic, e-mail distribution, an IP routing of the entire network.
- Users' identifications and software.

## Advantages of having a "Computer System Profile"

- In case of problem with any component, a system engineer can work more efficiently and identify the problem quicker.
- You can use this profile for upgrading the systems.
- Provides a great asset management of your computer systems.
- It can be used for insurance claims in case of any disaster.

## Method of Implementation:

At the client site(s), CRC will examine the entire network system and operation and collects the required data. These data are then entered into our software program to produce a comprehensive Computer System Profile.
