

BACKUP SOLUTION

It's time to give up tape backup and move on to Removable Hard Drives for back up. These hard drives are Hot-Swap. You can have a hard drive for every day of the week. Rotate them as needed. It is fast, easy to manage, reliable and hassle free.

Advantages:

- **Creates the exact image copy of your Servers hard disks**
- **Instantly restores the entire server including operating system, applications, and all the date in the event of fatal system crash**
- **No reinstallations required**
- **Minimizes downtime**

Our backup solution provides disk image files creation for backup or duplication purposes. A disk image file contains the exact, byte-by-byte copy of a hard drive, partition or logical disk.

With this solution, you can completely and rapidly restore your system after heavy data loss caused by an operating system crash, virus attack or hardware failure. If you need to restore only certain files from a disk image, you can connect that image as a virtual disk and copy those files directly from the disk image using Windows Explorer or any other file utility.

This technology is one of the best backup and disaster recovery solutions to prevent losing your data after a fatal system failure.
